

Features

Graphics for Digital Signage and Kiosk Applications

- 12-in. Panel PC with Projected Capacitive Multi-touch Screen
- Supports up to two additional Displays
- 2x DisplayPort with 4K Resolution

Performance for Industrial IoT Edge Computing

- Intel Apollo Lake-I E3900 Processor (Dual or Quad core)
- Up to 8GB DDR3L ECC System Memory
- Up to 2.0GHZ CPU Clock Rate
- Time-Coordinated Computing
- Soldered down TPM 2.0 Hardware Security Enabled
- 10+ Year Availability

Rugged Design for Demanding Environments

- -30°C to +85°C Operating Temperature Range
- Wide Range Power Input (10 - 50 V DC)
- IP65 certified, front panel and bezel

Connectivity and I/O for Embedded Data Acquisition

- 2x Gigabit Ethernet
- 2x USB 3.1 Gen 1 and 4x USB 2.0
- 8x General Purpose Input/Output (GPIO)
- 2x channel Analog-to-Digital (ADC)
- 3x Serial Ports
- HD Audio

Storage

- eMMC
- SATA with SATA Power
- mSATA

Expansion and Configuration Options for Semi-Custom Solutions

- Mini-PCI Express
- M.2 E-Key 2230 Form Factor
- WINSYSTEMS' Modular IO80 Expansion

Product Description

WINSYSTEMS' PPC12-427 is a fanless, IP65-certified 12.1-inch panel PC featuring the latest generation Intel Apollo Lake-I SOC processor. Its small size, low power and extended operational temperature make it a great fit for harsh environments in the industrial control, transportation, energy, and industrial IoT markets.

This full-featured Panel PC supports three independent video displays, one LVDS output to the 12.1-inch panel PC, two additional DisplayPorts, dual Ethernet, two USB 3.1 Gen 1 ports, four USB 2.0 ports, eight general purpose I/O (GPIO) lines, two channels Analog-to-Digital Converter (ADC), stereo audio, and a watchdog timer.

The WINSYSTEMS PPC12-427 features a Dual or Quad-Core processor, up to 8GB of socketed SODIMM DDR3L ECC SDRAM, and a mSATA socket with optional soldered-down eMMC device for solid state storage of operating systems (OS) and applications. Additionally, the board supports an external SATA device.

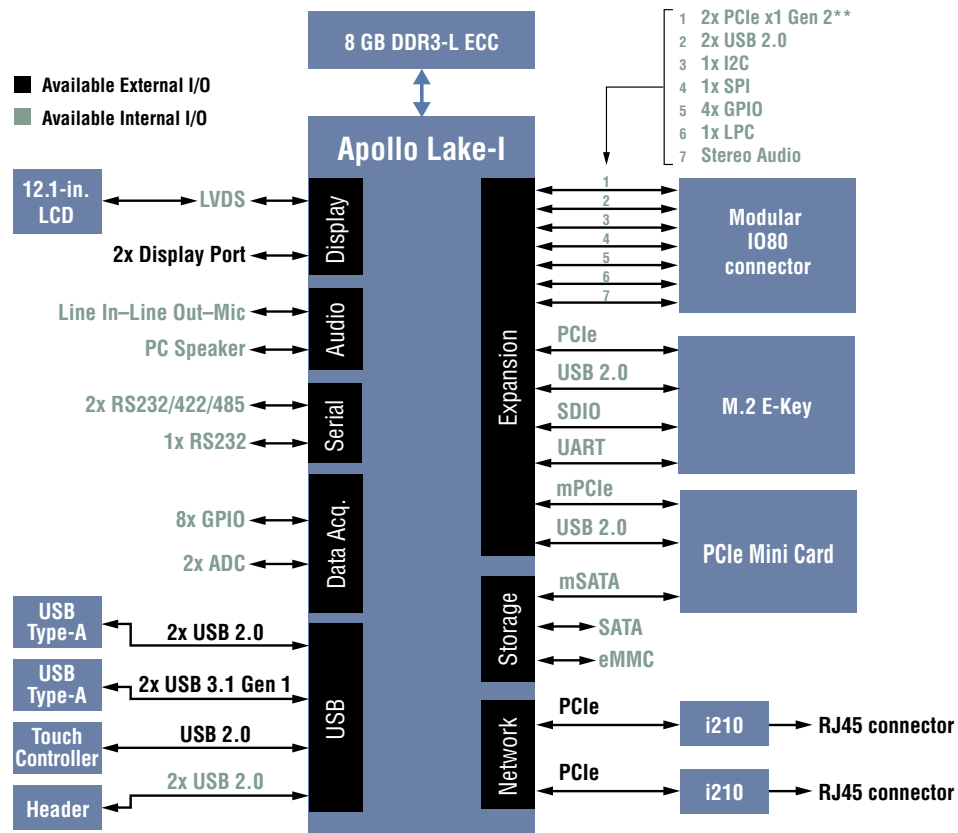

The Panel PC has expansion capabilities via a M.2 connector E-Key 2230, Mini-PCIe socket (with mSATA support) and WINSYSTEMS' Modular IO80 interface.

The PPC12-427 supports Linux, Windows® 10, and other x86-compatible real-time operating systems. Drivers are available from the WINSYSTEMS website.

Expansion and Customization Options

WINSYSTEMS provides additional cables, expansion cards, power supplies, and solid state drives to complete your embedded computing solution including data acquisition, communications, location, and other features via Mini-PCie, M.2, and IO80 interfaces. Our Application Engineers are available to guide you through product selection and customized options.
