

Features

Performance for Industrial IoT Applications

- DMP® Vortex86DX3® Processor (Dual core)
- Up to 2 GB DDR3-LV System RAM
- 1 GHz
- Low Power
- 10 Year Availability

Rugged Design for Demanding Environments

- -40°C to +85°C Operating Temperature Range
- PC/104-Plus Small Form Factor
- Shock and Vibration Tested
- +5V Input Power
- Watch Dog Timer

Connectivity and I/O for Embedded Systems

- Dual Ethernet (1x Fast Ethernet, 1x Gigabit)
- 4x USB 2.0
- 24x GPIO 5V with Event Sense
- 4x Serial Ports (2x RS-232, 2x RS-232/422/485)
- Parallel Port LPT
- Audio

Graphics Support

- VGA
- LVDS 1920x1440

Storage

- CompactFlash
- SATA

Expansion Options

- Full PC/104 ISA Support
- PCI-104

Product Description

WinSystems' PPM-C412 single board computer (SBC) is a PC/104-Plus form factor SBC featuring the latest generation DMP® Vortex86DX3® SOC processor. Its small size, low power, rugged design, and extended operational temperature make it a great fit for industrial IoT applications and embedded systems in the industrial control, transportation, Mil/COTS, and energy markets.

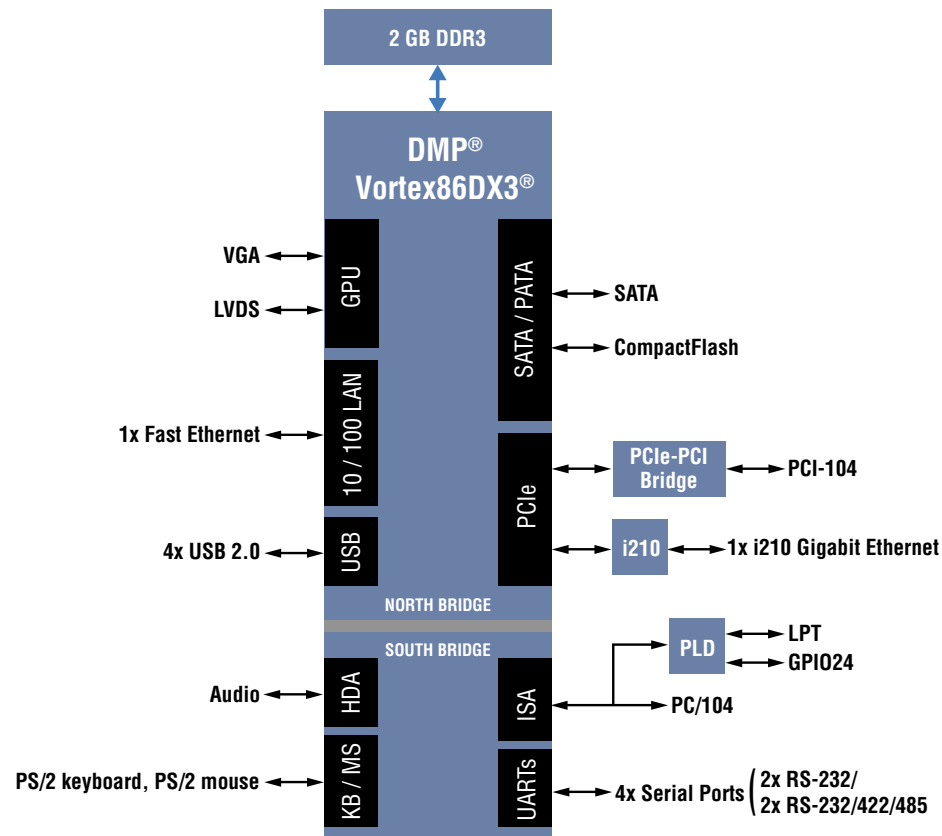

The WinSystems PPM-C412 single board computer features a 1GHz Dual Core CPU and up to 2GB of soldered down memory. The SBC includes a CompactFlash socket and external SATA connector for removable solid state storage of an operating systems (OS) and application.

This full-featured SBC includes PS2 mouse and keyboard support, VGA and LVDS video outputs, dual Ethernet, four USB 2.0 channels, one parallel port, 4 serial ports, 24 general purpose I/O (GPIO) lines, stereo audio, and a watchdog timer.

Additionally, the board has a PC/104-Plus expansion providing full native ISA bus support and PCI peripherals through a PCIe bridge.

The PPM-C412 supports Linux, DOS, and other x86-compatible real-time operating systems. Drivers are available from the WinSystems website.

Expansion and Customization Options

WinSystems provides additional cables, expansion cards, power supplies, and solid state drives to complete your embedded computing solution including data acquisition, communications, location, and other features via PC/104-Plus interfaces. Our Application Engineers are available to guide you through product selection and customized options.

Contact an Application Engineer or visit our website for more information.
